Professional Experience

Full Stack Web Developer
Coder Foundry
Jan 2023 – Mar 2023 | Kernersville, USA

- Created Traced, a fully functional multi-tenant bug/ticket tracking system using ASP.NET Core, MVC and PostgreSQL. Allows companies to track projects and the lifecycle of the trouble tickets within. Utilizes user and role based security to establish separation of duties.
- Created a blog platform, Humble Hacker, using ASP.NET Core, MVC and PostgreSQL. Implemented a role based security system, search, and email service. Database interaction done through LINQ to Entity Framework. Established an API to push blog posts to portfolio.
- Created AddressBook+, a fully functional contact management site using ASP.NET Core, MVC and PostgreSQL. Enables users to store contacts, filter by category, search and email contacts directly or by category. Database interaction done through LINQ to Entity framework.
- Created my portfolio site, a static page to showcase my abilities as a developer using HTML, JavaScript, CSS and Bootstrap. Called on the Humble Hacker API to populate blog posts
